# The TommyCraft

February 05, 2020

## Product Overview

For the recreational boater who needs strength and style, Hard Drive Marine can create a very seaworthy craft that is easy to maintain and provides the

comfort of a V-berth designed to sleep three. Some say these are overbuilt, but others say that they're built to last through whatever you care to put them through.

**Option:** Sea Machines 200 (SM200), an industrial-grade remote control for commercial workboats.
